

Who we are

Mansfield Technologies LLC, Mansfield, Ohio. A certified service-disabled veteran-owned small business providing mobile, on-site destruction of hard drives, solid-state media, tapes, phones, and other information systems media, with IT asset disposition and e-scrap removal. Founded by a ten-year U.S. Army Signal Corps veteran with six years supporting the Intelligence Community.

What a job includes

- The truck at your dock or lot; your staff witness every item destroyed.
- Magnetic drives degaussed on an NSA-listed degausser and shredded; solid-state media disintegrated to 2 mm particles; devices logged by asset tag and serial number.
- A digitally signed Certificate of Destruction and a serial-level media log, written to NIST SP 800-88 Rev. 2 and NSA/CSS Policy Manual 6-22, with a three-year audit right.
- Recycling of destroyed material through R2-certified partners; e-scrap removed with weight tickets.

Standards

NIST SP 800-88 Rev. 2 (every job); NSA/CSS 9-12 (classified media, under your security office's supervision); CJIS Security Policy; HIPAA; IRS Publication 1075; GLBA. Ohio HB 96 and ORC 9.64 place hardware disposal inside the cybersecurity program every political subdivision must maintain; the certificate documents that item.

How to buy

- Written quote from your counts and location; the quote is the price.
- Purchase order, invoice, or purchase card. Most jobs fall below competitive bidding thresholds for counties, cities, townships, and school districts.
- Federal: most single-site jobs fall under the micro-purchase threshold; SDVOSB set-asides and sole-source awards for larger work.
- Not yet on a GSA schedule, an Ohio State Term Schedule, or a cooperative contract; open to any for the right opportunity.

Company data

- **UEI** SKVZDQ3WXKM3 **CAGE** 9P0F2 **NAICS** 561990, 541519 **PSC** D399, S299
